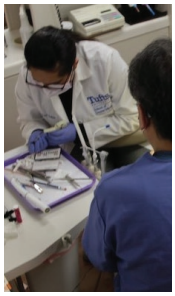
ADD ORTHODONTIC REVENUE TO YOUR GENERAL PRACTICE

Stop referring your orthodontic patients and keep that revenue in your own practice!



LECTURE & HANDS-ON CLINICAL EXPERIENCE

"Adults recall an estimated 40% more when learning with direct, purposeful experiences."
(NTCC 1993)

ROCKWALL, TEXAS 12-SESSION COURSE (2019-2021)

ACADEMY OF Gp ORTHODONTICS

Offering comprehensive orthodontic continuing education courses where you treat patients, not typodonts. Our 12-session course meets one weekend every two months and consists of a Friday classroom instruction and a Saturday comprehensive clinical hands-on training with direct patient treatment. All patients, materials, and supplies for the clinical sessions are provided by the Academy. The lectures include identification and understanding of the various types of patient malocclusions and how they can be treated effectively utilizing the Differential Straight-Arch® Technique. The knowledge gained through the Friday lecture/didactic format is reinforced by Saturday's clinical participation, allowing you the optimum learning experience.

The Academy's 12-session hands-on courses are designed to be the closest CE Course to an orthodontic residency for the General Practitioner.

"This course was a wonderful learning experience for me. It has given me the ability as a general practitioner to confidently treat those patients already in my practice who desire orthodontic treatment. And the best part is the network of fellow students and our instructor, who was always there to help with challenging cases. I highly recommend this course."
– T. Jacobsen, D.D.S.

TECHNIQUE ADVANTAGES

The Differential Straight-Arch® Technique is a comprehensive, fixed orthodontic appliance that facilitates learning because it is divided into three stages of treatment. The bracket has the following advantages:

- It reduces the need for functional appliances, head gear, or any distalizing mechanics.
- Extraction cases can be treated much easier.
- Teeth can be moved using light forces without anchorage strain.
- It reduces the need for orthognathic surgery.
- Anterior deep bites can be opened without the need for bite planes.

Comprehensive orthodontics where you treat patients, not typodonts!

COURSE ADVANTAGES

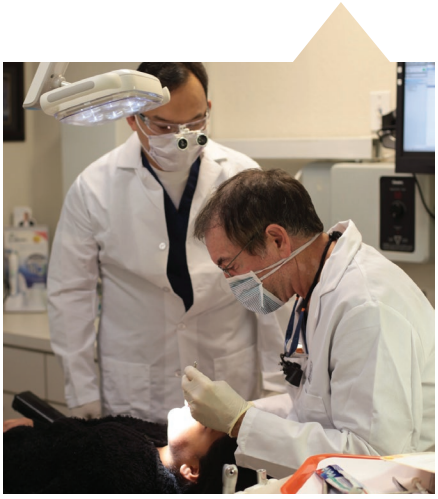
- It provides clinical training with patients for a hands-on experience.
- Treat a case load of patients from bracketing to retention for a full clinical experience.
- Participants are encouraged to begin cases in their own practices by the third or fourth session.
- There is ongoing mentoring and case consultation, along with available staff training.
- You will have the same instructor for each session with monitoring privileges upon completion.
- It is an invaluable source of CDE hours at a reasonable cost.

CLINICAL ORTHODONTIC TRAINING

A highly qualified team of instructors, clinical instructors, and hosts provide on-going support and invaluable comprehensive clinical hands-on training with direct patient treatment to ensure excellent case results. Courses are limited in number of participants in order to maintain an optimum, dynamic student-to-instructor learning experience in a clinical setting. By the third session, you are encouraged to start orthodontic cases in your own practice. Course tuition and expenses are easily recovered by beginning three to four cases in your own practice. You are encouraged to bring patient records to the Friday sessions for case mentoring and troubleshooting. Tuition also includes monitoring for one year upon completion of the course, with current AGpO membership.

You will have the same instructor for all 12 sessions and on-going mentoring after the course is completed.

"I took this course with the intention of improving my esthetic cases, but after starting the course I soon realized how orthodontics was going to become a big portion of my practice. The lecture and hands-on training gave me the confidence after a few sessions to begin some cases. Now after completing the course, orthodontics has become a real enjoyment for me and my staff. " – K. Stodola, D.D.S.



COURSE FORMAT

This Comprehensive Clinical Orthodontic Course will meet one weekend every two months for a total of 12 sessions. **In addition to treating patients, participants will develop a digital library by taking intra-oral photographs of hands-on patients and will give case presentations to the class during the Friday seminar session. There will also be time to go over case records brought from each participant's own practice.** Along with diagnosis and technique, the Friday seminar will include:

- Etiology/Causation
- Growth and development
- Early/Interceptive treatment
- Diagnosis
- Treatment planning
- Facial esthetics
- Orthodontic mechanics
- Palatal expansion
- Space maintenance
- Creating space/Air Rotor Stripping
- Impactions
- Surgical orthodontics
- Oral habits
- Limited cases
- TMD
- Finishing
- Retention
- Practice and risk management

COURSE OBJECTIVES

- Diagnosis
- Treatment Planning
- Active Treatment
- Case Finishing
- De-bracketing
- Retention
- Ortho Practice Management

Tuition is quickly recovered by starting 3-4 cases in your own practice.

Increase revenue and confidently incorporate orthodontics into your general practice!

SESSION OBJECTIVES

"Introductory Orthodontic Session" – A one-day session allowing potential course participants the opportunity to experience a lecture session, meet the instructor, the clinical instructor(s) and/or host dentist and visit the clinical facility.

The lecture consists of a lecture of current ideas and trends in orthodontics and will allow the participant to view documented case presentations of cases treated in the course and a question and answer (Q & A) period regarding the course curriculum and the Differential Straight-Arch® Technique (Tip-Edge® System).

These introductory sessions will assist the participant in making an informed decision as to whether he/she will make the commitment to participate in the comprehensive 12-session hands-on program. This will also allow the instructor, the clinical instructor(s) and/or host dentist the opportunity to meet and interview potential course participants. Course enrollment is based on "a first-come, first-served basis". Potential enrollees have one week following the introductory session to enroll in the course. Enrollment is full tuition, including 2 years AGpO membership. All course enrollments are contingent upon approval by the course instructor following the introductory session.

COURSE GOALS

- To facilitate your professional growth by providing an environment in which you will learn by doing.
- To enable you to more comprehensively service those who come to you for dental care.
- To help you become knowledgeable and confident in providing orthodontic treatment to your patients.

LEARN BY DOING

Upon completion you will be able to:

- Have a comprehensive knowledge and understanding of orthodontic treatment using the Differential Straight-Arch® Technique and patient treatment.
- Effectively diagnose and develop a treatment plan for each case.
- Have an understanding of the variables affecting treatment and treatment outcome.
- Have a proficiency in treating orthodontic malocclusions seen in your practice.
- Confidently incorporate orthodontics into your general practice!

TYPICAL SESSION SCHEDULE

Friday

8:00 a.m. to noon

- (Classroom) Lecture and Participation: Seminar/Lecture/Diagnosis/Case Presentation/Typodont Exercises

1:00 p.m. to 5:00 p.m.

- Diagnosis/Case Presentations and Treatment Planning for Patients to be seen in the clinic
- Optional consultation session with instructor in diagnosis and treatment of patient records brought from each participant's practice.

Saturday

8:00 a.m. to 4:00 p.m.

- (Clinical) Participation: Hands-on Patient Treatment

We limit number of participants for a dynamic clinical learning environment.

BECOME KNOWLEDGEABLE AND CONFIDENT IN ORTHODONTICS

The Academy of Gp Orthodontics has provided comprehensive orthodontic continuing education courses for the General Practitioner for 30 years.

COURSE OUTLINE:

SESSION I

Outline

- Introductions
- Evolution of the Differential Straight-Arch® Technique
- Introduction to Stage One
- Discussion of the orthodontic work-up
- Introduction to clinical patients

Objectives

- Explain the steps needed for the orthodontic work-up
- Explain the Differential Straight-Arch® Technique
- Explain and demonstrate Stage One
- Perform initial banding and bonding of patients in clinic

SESSION II

Outline

- Stage One Treatment in detail
- Review of clinical Patients from Session I
- Diagnosis Lecture
- Cephalometric, Model, and Bolton Analysis
- Patient consult appointment
- Patient informed consent
- Treatment financing arrangements

Objectives

- Explain Stage One in greater detail
- Recognize and identify the information needed to diagnose the orthodontic patient.
- Describe diagnosis and clinical application of the technique
- Begin to interpret the different types of analyses: Cephalometric, model, Bolton
- Describe the patient consult appointment including financial arrangements

SESSION III

Outline

- Review Stage One
- Stage One problems/troubleshooting
- Palatal expansion
- Cuspid impactions
- Diagnosis Lecture (cont'd)
- Review of clinical patients from Session II

Objectives

- Review and explain all aspects of Stage One treatment and describe problem areas relating to this stage of treatment.
- Discuss the clinical application of the technique in detail
- Explain and demonstrate palatal expansion and cuspid impaction

SESSION IV

Outline

- Introduction - Pre-Stage Two and Stage Two
- Ortho diagnosis (cont'd)
- Review of clinical patients from Session III
- Creating Space/Air-Rotor Stripping
- TMJ Disorders

Objectives

- Discuss Pre-Stage Two, Stage Two, and Pre-Stage Three.
- Clinical application of the Stages of treatment will be covered as well
- Explain the Air-Rotor Stripping Technique
- Discuss and explain TMD disorder and its relationship to orthodontics
- Learn to interpret diagnoses

SESSION V

Outline

- Stage Two, Pre-Stage Three, in detail
- Etiology of malocclusion
- Extraction and non-extraction treatment
- Review of clinical patients from Session IV

Objectives

- Recall Stage One through Pre-Stage Three
- Discuss problem areas relating to these Stages and their clinical application
- Describe the etiology of malocclusion
- Explain the difference between non-extraction and extraction treatment
- Recognize various extraction site options

(Continued)

SESSION VI

Outline

- Practice Management
- Review of clinical patients from Session V
- Review Stage One, Two, Pre-Three
- Midterm Exam

Objectives

- Explain and discuss practice management of the orthodontic patient as it relates to finance
- Discuss and review the various aspects of the Differential Straight-Arch® Technique covered in session's I-V

SESSION VII

Outline

- Introduction to Stage Three
- Lecture on tooth movement mechanics and apical resorption
- Review of clinical patients from Session VI

Objectives

- Identify and discuss Stage Three
- Explain tooth movement and the problems of root resorption

SESSION VIII

Outline

- Stage Three in detail
- Airways and oral habits
- Review of clinical patients from Session VII
- Risk Management

Objectives

- Discuss and review of Stage Three of the Differential Straight-Arch® Technique
- Explain and discuss risk management as it relates to the orthodontic patient
- Discuss various patient oral habits and their relationship to orthodontic malocclusions

SESSION IX

Outline

- Review all stages
- Review of clinical patients from Session VIII
- Finishing
- Growth/Development
- Functional appliances

Objectives

- Explain and demonstrate the various case finishing techniques
- Discuss functional appliances that can be used in conjunction with the Differential Straight-Arch® Technique
- Explain growth and development and their importance to the orthodontic patient

SESSION X

Outline

- Early treatment
- Limited treatment
- Review diagnosis
- Review of Clinical patients from Session IX

Objectives

- Describe the pros and cons of One-Phase vs. Two-Phase Orthodontic Treatment
- Explain the uses of limited treatment objectives in select patients

SESSION XI

Outline

- Debanding and Retention
- Orthognathic Surgery
- Troubleshooting
- Review of Clinical patients from Session X
- Early treatment (cont'd)

Objectives

- Develop a retention plan
- Explain the various orthognathic surgery options vs. a camouflage approach
- Discuss treatment timing in young patients
- Discuss troubleshooting of patients deviating from the treatment plan

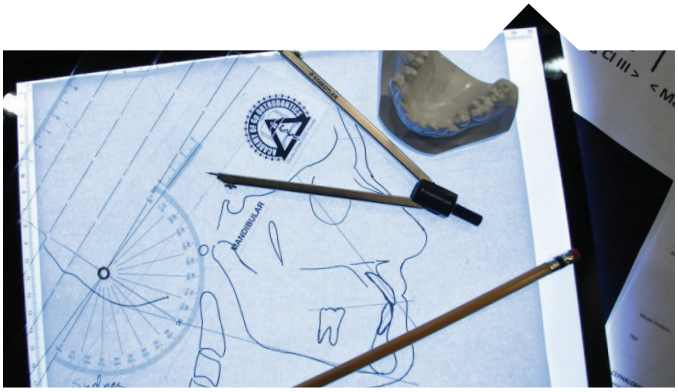
SESSION XII

Outline

- Review of clinical patients from Session XI
- Final Review
- Final Exam
- Graduation & Awards Dinner

Objectives

- Discuss and review the Differential Straight-Arch® Technique from work-up to retention



GENERAL NOTE - The Differential Straight-Arch technique employs differential forces and mechanics and is separated into three main stages. Each stage has its own objectives which are explained in detail in the course text. This has proven helpful for those teaching, as well as learning, and in general facilitates treatment, and improves the quality of the results.

INCORPORATE ORTHODONTICS INTO TO YOUR PRACTICE

Austin, TX Course Introductory Session
Saturday, August 24, 2019

Earn 6 CDE credits, plus see if this course is right for you!

YOUR INSTRUCTOR/HOST

Robert Allen, D.D.S., a 1985 graduate of the University of Texas Health Science Center at San Antonio, has been a solo practitioner in Rockwall, Texas since 1987. He completed the Academy of Gp Orthodontics' 12 Session Course under Dr. Ron Austin in 1994, and received his Diplomate from the Academy in 1996.

Dr. Allen has been a host dentist and clinical instructor for the Academy since 1992. He has actively practiced orthodontics since1989, completing over 500 Tip-Edge® cases, carrying a caseload of over 50 patients annually.

Although he attributes the mainstay of his orthodontic training to the Academy and more specifically to Dr. Austin, he has attended over 500 hours of orthodontic continuing education, including courses and lectures from Dr. Charlie Yates, Dr. Pete Kesling, Dr. Chris Kesling, Dr. Robert Gerety, and Dr. Tom Mulligan, among others.

He is a current member of the North Texas Dental Society, the Texas Dental Association, the American Dental Association, and the Academy of Gp Orthodontics, the Air Transport Arm of Christ, and Lakepointe Church.

"Going into the course, I had no idea about tooth movement and fixed orthodontics. At about 4 months into the course I was so amazed at what I had learned and put into practice. I have recommended it to my colleagues already. Thank you for giving me the opportunity to learn about Tip-Edge."
– A. Omilabu, D.D.S.

FEES AND CDE HOURS

Tuition for the 12-session course (minimum of 150 CDE hours) is $14,990 USD, including two years of Academy membership. Earn up to 225 CDE hours by monitoring the next course at no additional charge. Our Introductory Orthodontic Session (6 CDE hours) is $150 USD and has a twofold purpose. Use it as an introductory trial session, with a 5 day timeframe to register and confirm enrollment in the 12-session course. Or, enroll in the 12-session course in advance and use it as Session I – a working weekend with lecture and clinical patients. Our Introductory Weekend Session (12 CDE hours) is $200 USD and is required for that specific 12-session course. Either Introductory Session fee will be waived if the participant enrolls in the full course. A CDE hours verification record is given to participants upon completion of the course. Associate Fellowship status is awarded upon satisfactory completion of the course as outlined in the hands-on course syllabus.

MEMBERSHIP

Two years of membership in the Academy is included in the course tuition. After that, membership dues are $295 USD per year. Membership includes a certificate, quarterly newsletter/journal, a reference CD with patient forms/letters and marketing materials to help you incorporate orthodontics into your practice. In addition, the annual meeting registration fee is discounted 50% for the first- and second-year participant. The Academy networks and assists members in gaining additional knowledge in orthodontics through its annual, national convention and educational program. Members are encouraged to attend and bring cases from their practice for discussion. Membership allows your instructor mentoring service with free case problem solving consultation.

Earn up to 225 CDE hours by monitoring the next course at no additional charge.

"Taking this hands-on orthodontic course was the best continuing education decision I have ever made! There are other classroom/typodont only courses out there, but there is NO substitute for learning comprehensive orthodontics on patients."
– D. Smith, D.D.S.

Each Friday lecture session is reinforced by Saturday's clinical participation session for an optimal learning experience.

ARMAMENTARIUM

Participants will be provided a course binder, technique guide, lab exercise material, lecture and clinical handouts. All clinical patients and instruments will be provided. A dentist who does not hold a current Texas dental license will be paired with a licensed Texas dentist. Each participant will be required to bring some diagnostic materials; a list will be provided.
