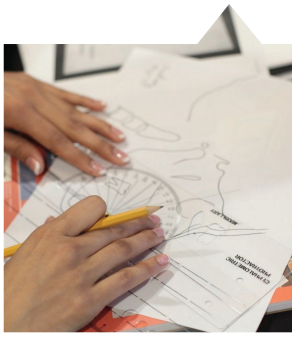
ACADEMY OF Gp ORTHODONTICS
1987
Charles D. Yates, D.D.S., Founder

ADD COMPREHENSIVE ORTHODONTICS TO YOUR GENERAL PRACTICE



LECTURE AND HANDS-ON CLINICAL EXPERIENCE

BRUNSWICK, OH | 2020-2022

"Adults recall an estimated 40% more when learning with direct, purposeful experiences."
(NTCC 1993)

Stop referring your orthodontic patients and keep that revenue in your own practice!

ACADEMY OF Gp ORTHODONTICS

Offering comprehensive orthodontic continuing education courses where you treat patients, not typodonts. Our 12-session course meets one weekend every two months and consists of a Friday classroom instruction and a Saturday comprehensive clinical hands-on training with direct patient treatment. All patients, materials, and supplies for the clinical sessions are provided by the Academy. The lectures include identification and understanding of the various types of patient malocclusions and how they can be treated effectively utilizing the Differential Straight-Arch® Technique. The knowledge gained through the Friday lecture/didactic format is reinforced by Saturday's clinical participation, allowing you the optimum learning experience.

The Academy's 12-session hands-on courses are designed to be the closest CE Course to an orthodontic residency for the General Practitioner.

"This course was a wonderful learning experience for me. It has given me the ability as a general practitioner to confidently treat those patients already in my practice who desire orthodontic treatment. And the best part is the network of fellow students and our instructor, who was always there to help with challenging cases. I highly recommend this course."
– T. Jacobsen, D.D.S.

TECHNIQUE ADVANTAGES

The Differential Straight-Arch® Technique is a comprehensive, fixed orthodontic appliance that facilitates learning because it is divided into three stages of treatment. The bracket has the following advantages:

- It reduces the need for functional appliances, head gear, or any distalizing mechanics.
- Extraction cases can be treated much easier.
- Teeth can be moved using light forces without anchorage strain.
- It reduces the need for orthognathic surgery.
- Anterior deep bites can be opened without the need for bite planes.

Comprehensive orthodontics where you treat patients, not typodonts!

COURSE ADVANTAGES

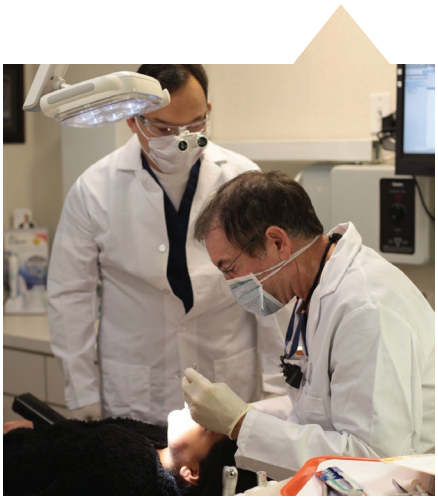
- It provides clinical training with patients for a hands-on experience.
- Treat a case load of patients from bracketing to retention for a full clinical experience.
- Participants are encouraged to begin cases in their own practices by the third or fourth session.
- There is ongoing mentoring and case consultation, along with available staff training.
- You will have the same instructor for each session with monitoring privileges upon completion.
- It is an invaluable source of CDE hours at a reasonable cost.

CLINICAL ORTHODONTIC TRAINING

A highly qualified team of instructors, clinical instructors, and hosts provide on-going support and invaluable comprehensive clinical hands-on training with direct patient treatment to ensure excellent case results. Courses are limited in number of participants in order to maintain an optimum, dynamic student-to-instructor learning experience in a clinical setting. By the third session, you are encouraged to start orthodontic cases in your own practice. Course tuition and expenses are easily recovered by beginning three to four cases in your own practice. You are encouraged to bring patient records to the Friday sessions for case mentoring and troubleshooting. Tuition also includes monitoring for one year upon completion of the course, with current AGpO membership.

You will have the same instructor for all 12 sessions and on-going mentoring after the course is completed.

"I took this course with the intention of improving my esthetic cases, but after starting the course I soon realized how orthodontics was going to become a big portion of my practice. The lecture and hands-on training gave me the confidence after a few sessions to begin some cases. Now after completing the course, orthodontics has become a real enjoyment for me and my staff. " – K. Stodola, D.D.S.



COURSE FORMAT

This Comprehensive Clinical Orthodontic Course will meet one weekend every two months for a total of 12 sessions. **In addition to treating patients, participants will develop a digital library by taking intra-oral photographs of hands-on patients and will give case presentations to the class during the Friday seminar session. There will also be time to go over case records brought from each participant's own practice.** Along with diagnosis and technique, the Friday seminar will include:

- Etiology/Causation
- Growth and development
- Early/Interceptive treatment
- Diagnosis
- Treatment planning
- Facial esthetics
- Orthodontic mechanics
- Palatal expansion
- Space maintenance
- Creating space/Air Rotor Stripping
- Impactions
- Surgical orthodontics
- Oral habits
- Limited cases
- TMD
- Finishing
- Retention
- Practice and risk management

COURSE OBJECTIVES

- Diagnosis
- Treatment Planning
- Active Treatment
- Case Finishing
- De-bracketing
- Retention
- Ortho Practice Management

Tuition is quickly recovered by starting 3-4 cases in your own practice.

Increase revenue and confidently incorporate orthodontics into your general practice!

SESSION OBJECTIVES

"Introductory Orthodontic Session" – A one-day session allowing potential course participants the opportunity to experience a lecture session, meet the instructor, the clinical instructor(s) and/or host dentist and visit the clinical facility.

The lecture consists of a lecture of current ideas and trends in orthodontics and will allow the participant to view documented case presentations of cases treated in the course and a question and answer (Q & A) period regarding the course curriculum and the Differential Straight-Arch® Technique (Tip-Edge® System).

These introductory sessions will assist the participant in making an informed decision as to whether he/she will make the commitment to participate in the comprehensive 12-session hands-on program. This will also allow the instructor, the clinical instructor(s) and/or host dentist the opportunity to meet and interview potential course participants. Course enrollment is based on "a first-come, first-served basis". Potential enrollees have one week following the introductory session to enroll in the course. Enrollment is full tuition, including 2 years AGpO membership. All course enrollments are contingent upon approval by the course instructor following the introductory session.

COURSE GOALS

- To facilitate your professional growth by providing an environment in which you will learn by doing.
- To enable you to more comprehensively service those who come to you for dental care.
- To help you become knowledgeable and confident in providing orthodontic treatment to your patients.

LEARN BY DOING

Upon completion you will be able to:

- Have a comprehensive knowledge and understanding of orthodontic treatment using the Differential Straight-Arch® Technique and patient treatment.
- Effectively diagnose and develop a treatment plan for each case.
- Have an understanding of the variables affecting treatment and treatment outcome.
- Have a proficiency in treating orthodontic malocclusions seen in your practice.
- Confidently incorporate orthodontics into your general practice!

TYPICAL SESSION SCHEDULE

Friday

8:00 a.m. to noon

- (Classroom) Lecture and Participation: Seminar/Lecture/ Diagnosis/Case Presentation/ Typodont Exercises

1:00 p.m. to 5:00 p.m.

- Diagnosis/Case Presentations and Treatment Planning for Patients to be seen in the clinic
- Optional consultation session with instructor in diagnosis and treatment of patient records brought from each participant's practice.

Saturday

8:00 a.m. to 4:00 p.m.

- (Clinical) Participation: Hands-on Patient Treatment

We limit number of participants for a dynamic clinical learning environment.

BECOME KNOWLEDGEABLE AND CONFIDENT IN ORTHODONTICS

The Academy of Gp Orthodontics has provided comprehensive orthodontic continuing education courses for the General Practitioner for over 30 years.

COURSE OUTLINE

INTRODUCTORY WEEKEND SESSION

- What is the Academy of Gp Orthodontics?
- Meet your instructor
- How the course is set up
- Overview of the Differential Straight-Arch® Technique
- How being able to do comprehensive orthodontics can help build your practice

SESSION I

- Introductions
- Evolution of orthodontics and the Differential Straight-Arch® Technique
- Overview of the 3 stages of the technique:
  1. Stage I is to straighten anterior teeth
  2. Stage II is to close any posterior space
  3. Stage III is to reach final tip and torque of teeth
- Introduction to Stage One
- Discussion of the orthodontic work-up
- Introduction to clinical patients

SESSION II

- Stage One Treatment in detail
- Diagnosis overview
  a. Facial profile analysis
  b. Model analysis
  c. Cephalometric Analysis
- Patient consult appointment
- Patient informed consent
- Treatment financing arrangements
- Review of clinical Patients from Session I

SESSION III

- Review Stage One
- Troubleshooting Stage One problems
- Diagnosis Continued:
  a. Cephalometric Analysis
  b. Putting Diagnosis all together.
- Extractions
- Palatal expansion
- Cuspid impactions
- Review of clinical patients from Session II

SESSION IV

- Stage I troubleshooting
- Introduction - Pre-Stage Two and Stage Two
- Diagnosis (cont'd)
- Creating Space/Air-Rotor Stripping
- TMJ Disorders
- Patient management
- Begin Stage II - Closing posterior space
- Review of clinical patients from Session III

SESSION V

- Stage Two and Pre-Stage Three in detail
- Etiology of malocclusion
- Extraction and non-extraction treatment
- Stage II continued:
  a. Correcting midlines
  b. Getting first molars into a Class I relationship.
- Review of clinical patients from Session IV

SESSION VI

- Practice Management
- Review of Stages One, Stage Two, and Pre-Three
- Review of clinical patients from Session V
- Midterm Exam

SESSION VII

- Introduction to Stage Three
- Lecture on tooth movement mechanics
- Molar Distalization
- Root Resorption
- Review of clinical patients from Session VI

SESSION VIII

- Stage Three in detail
- Risk Management
- Review of clinical patients from Session VII

SESSION IX

- Review all stages
- Review of clinical patients from Session VIII
- Case finishing in detail

(Continued)

SESSION X

- Early treatment
- Limited treatment
- Review diagnosis
- Mixed Dentition
  a. Analysis & Treatment
  b. Space Loss
  c. Space Management: Creating/Maintaining
  d. Etiology of Growth & Development
- Functional Appliances
  - Herbst
  - Jasper Jumper
  - Twin Force Bite Corrector
- Airways & Oral habits
- De-impacting Erupting Molars
- Review of Clinical patients from Session IX

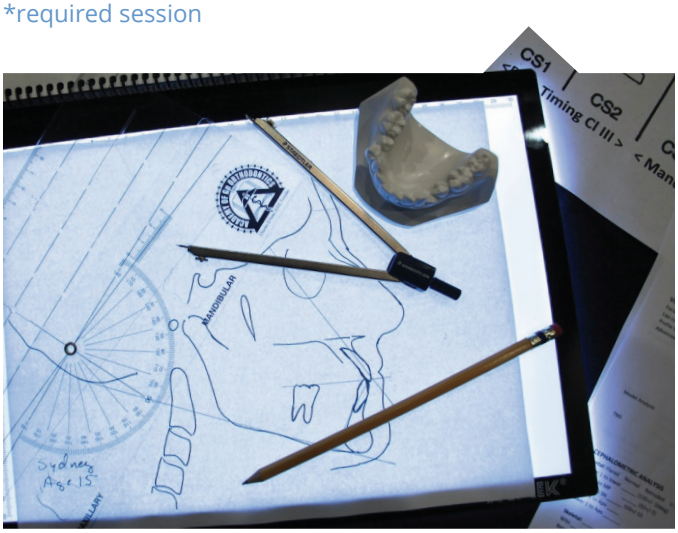
SESSION XI

- Early treatment (cont'd)
- Debanding and Retention
- Orthognathic Surgery
- Troubleshooting
- Review of Clinical patients from Session X
- Cosmetic Considerations:
  a. Veneers
  b. Small laterals
  c. Missing laterals
  d. Chipped anteriors
- TMD as it relates to Orthodontics

SESSION XII

- Final Review
- Practice Risk Management
- Final Exam
- Bonus Topics – based on class requests.
- Review of clinical patients from Session XI
- Graduation & Awards Dinner

*required session



GENERAL NOTE - The Differential Straight-Arch technique employs differential forces and mechanics and is separated into three main stages. Each stage has its own objectives which are explained in detail in the course text. This has proven helpful for those teaching, as well as learning, and in general facilitates treatment, and improves the quality of the results.

"I have been confidently practicing ortho thanks to this course. It was money well spent. I strongly recommend this course to anyone who would like to learn ortho in an open and supportive environment." – C. Swenson, D.D.S.

PROGRAM COMPARISON CHART

Academy's Comprehensive Orthodontic Program	Other Orthodontic Programs
2 year continuous, comprehensive program	Multiple programs patched together
Work on actual patients	Work on typodonts
Develop comfort level from treating these patients	No comfort level because you have to start on patients with no instructor to help or intraoral experience
No charge for consultation on cases in personal practice – we feel it is part of the learning process so it is part of the curriculum	Most other courses charge extra if they offer help on personal cases
Complete diagnostic training on patients being treated in course helps "connect the dots"	Limited diagnostic training only getting to see photos of results
Continuous training from diagnosis to retention	Training broken up into different / separate courses
Encouraged to start cases in own practice during course and provided w/ plenty of mentoring on diagnosis, treatment planning, and trouble-shooting	Receive instruction with little additional help or encouragement in starting cases causing a disconnect between what is learned and what is implemented in practice

HANDS-ON COURSE DATES

2020

January 24 (Friday) | Introductory Orthodontic Session

March 6-7 | Session I
May 1-2 | Session II
June 26-27 | Session III
August 28-29 | Session IV
October 23-24 | Session V
December 11-12 | Session VI

2021

February 12-13 | Session VII
April 16-17 | Session VIII
August 13-14 | Session IX
October 8-9 | Session X
December 3-4| Session XI

2022

Jan. 21-22 | Session XII & Graduation

INTRODUCTORY ORTHODONTIC SESSION

BRUNSWICK, OH | FRIDAY, JAN. 24, 2020

Earn 6 CDE credits for $150 USD, plus see if this course is right for you!

YOUR INSTRUCTOR

Milton Ntragatakis, D.D.S., M.S.D. is a 2006 Graduate of Case Western Reserve University, where he stayed two additional years for his Pediatric Dentistry training. Since then, he has served on faculty at the University's Dental School, while opening up his private practice in Brunswick, OH in 2010. Dr. Milton has actively practiced orthodontics for the last 10 years, and attributes the majority of his training to Dr. Gerry Samson's courses in Atlanta, Georgia. It was in one of those courses he met Dr. Ron Austin, who introduced him to the Academy's Hands-on Courses. He has completed over 400 hours of orthodontic continuing education and he currently hosts the Academy's 12-Session Comprehensive Hands-On Course in Brunswick, OH. He is currently a member of the Greater Cleveland Dental Society, the Ohio Dental Association, the American Academy of Pediatric Dentistry and the Academy of Gp Orthodontics.

"Going into the course, I had no idea about tooth movement and fixed orthodontics. At about 4 months into the course I was so amazed at what I had learned and put into practice. I have recommended it to my colleagues already. Thank you for giving me the opportunity to learn about Tip-Edge."
– A. Omilabu, D.D.S.

FEES AND CDE HOURS

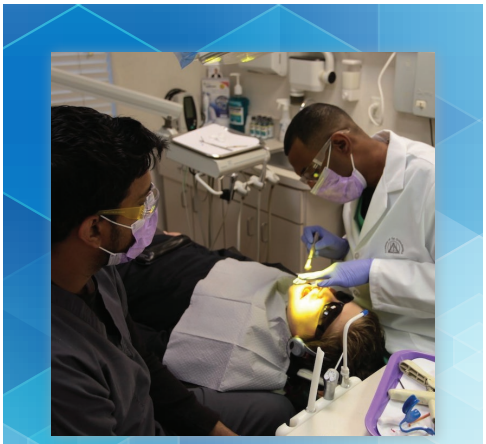
Tuition for the 12-session course (minimum of 150 CDE hours) is $14,990 USD, including two years of Academy membership. Earn up to 225 CDE hours by monitoring the next course at no additional charge. Our Introductory Orthodontic Session (6 CDE hours) is $150 USD and has a twofold purpose. Use it as an introductory trial session, with a 5 day timeframe to register and confirm enrollment in the 12-session course. Or, enroll in the 12-session course in advance and use it as Session I – a working weekend with lecture and clinical patients. Our Introductory Weekend Session (12 CDE hours) is $200 USD and is required for that specific 12-session course. Either Introductory Session fee will be waived if the participant enrolls in the full course. A CDE hours verification record is given to participants upon completion of the course. Associate Fellowship status is awarded upon satisfactory completion of the course as outlined in the hands-on course syllabus.

MEMBERSHIP

Two years of membership in the Academy is included in the course tuition. After that, membership dues are $295 USD per year. Membership includes a certificate, quarterly newsletter/journal, a reference CD with patient forms/letters and marketing materials to help you incorporate orthodontics into your practice. In addition, the annual meeting registration fee is discounted 50% for the first- and second-year participant. The Academy networks and assists members in gaining additional knowledge in orthodontics through its annual, national convention and educational program. Members are encouraged to attend and bring cases from their practice for discussion. Membership allows your instructor mentoring service with free case problem solving consultation.

Earn up to 225 CDE hours by monitoring the next course at no additional charge.

"Taking this hands-on orthodontic course was the best continuing education decision I have ever made! There are other classroom/typodont only courses out there, but there is NO substitute for learning comprehensive orthodontics on patients."
– D. Smith, D.D.S.



Each Friday lecture session is reinforced by Saturday's clinical participation session for an optimal learning experience.

ARMAMENTARIUM

Participants will be provided a course binder, technique guide, lab exercise material, lecture and clinical handouts. All clinical patients and instruments will be provided. A dentist who does not hold a current Ohio dental license will be paired with a licensed Ohio dentist. Each participant will be required to bring some diagnostic materials; a list will be provided.
